

Atlas-X1™ Cat 6 Component-Rated UTP QuickPort® Jack

APPLICATION

Atlas-X1 Cat 6 Component-Rated UTP QuickPort Jacks support 1000BASE-T networks. The jack is part of a complete Atlas-X1 Cat 6 UTP system, ideal for the most demanding mission-critical network applications. The jack supports emerging technologies and will easily adapt to network trends.

SPECIFICATION

The jack shall meet or exceed all requirements for channel- and component-level performance as described in ANSI/TIA-568.2-D for Category 6 standards, as well as Class E requirements described in ISO/IEC 11801-1. The jack shall comply with all National Electrical Codes, be compliant with ANSI/TIA-1096-A, be UL listed, and be independently verified. The jack body shall be made of die-cast zinc and all plastic components shall be made of high-impact, fire-retardant plastic rated UL 94V-0. The jack shall support tool-free termination/re-termination and shall not require a specialized termination tool. The jack wiring shall be universal to accommodate T568A and T568B wiring schemes. The jack shall be available in 13 colors; more than established by the ANSI/TIA-606-C standard. The jack shall be offered in standard and shuttered styles and select jacks shall be supplied with interchangeable icons. It shall support Power over Ethernet up to 100 watts.

DESIGN CONSIDERATIONS

- Use in any QuickPort housing to support Cat 6 UTP connectivity in surface-mount, flush-mount, or modular furniture outlets and field-configurable panels
- Can be used in conjunction with other QuickPort snap-in modules for voice/data/video applications over UTP, coax, and fiber
- To identify ports, use different colored modules and icons (13 ANSI/TIA-606-C compatible colors)
- Robust housing and internal shutter protects the jack in harsh environments

FEATURES

- Independently tested and guaranteed to exceed all component, permanent link, and channel margins
- Patented Retention Force Technology™ (RFT) protects against time damage and increases system longevity
- For Power over Ethernet, RFT maintains contact force between plug and jack, preventing arcing from intermittent disconnects
- Unique design supports tool-free termination/re-termination and requires no specialized termination tool
- Short jack design supports a wider range of applications (e.g. shallow boxes, enclosures, bend radius, etc.)
- Terminates from 26 to 22-gauge solid or stranded conductors for use on various cable types
- Robust IDCs can withstand 20 re-termination cycles and jack contacts are tested for 750 plug-mating cycles to ensure system longevity
- Available in 13 ANSI/TIA-606-C compatible colors
- Select jacks available with interchangeable icons (voice, data, A/V, and blank, color coded to match the jack face), for easy identification and tracking of data, voice, or other functions
- Jack with internal shutter protects against dust and debris
- Solid metal body dissipates 53% more heat than traditional plastic, minimizing damage from excess heat in PoE applications
- Tine geometry prevents arcing damage where plug and jack make contact

STANDARDS COMPLIANCE

- ANSI/TIA-568.2-D (Cat 6)
- cULus Listed
- UL 2043 Plenum Certified
- RoHS 2
- ISO/IEC 11801-1 (Class E)
- IEC 60603-7 (includes IEC 60512-5-2)
- IEC 60512-99-001 (includes IEC 60512-9-3)
- ANSI/TIA-1096-A (formerly FCC Part 68)
- PoE standards: IEEE 802.3af, 802.3at, 802.3bt, Cisco UPoE, and Power over HDBaseT™ (PoH) up to 100 watts

PHYSICAL SPECIFICATIONS

Dimensions: See page two
Materials: **Jack Body:** Die-cast zinc
Spring-Wire Contacts: High-quality, copper-based alloy, plated with 50 micro-inches of gold
Environmental Conditions: **Storage Temperature:** -40 °C to +70 °C
Operating Temperature: -10 °C to +60 °C

WARRANTY INFORMATION

Limited product and limited extended warranties are rendered VOID if the installed structured cabling system is used for Power over Ethernet applications that exceed the product's specified power rating.
